Keith Hickman	Applied Datamining	(Instructor:	Hasan Kurban	Online): Homework #1	L
---------------	--------------------	--------------	--------------	----------------------	---

## Contents

Problem 1	3
Problem 2	3

## Problem 1

Listing ?? shows R script that graphs a function  $f(x) = (1+1/x)^x$  at points  $x = 1, 6, 11, \dots, 200$ . The graph is saved to plot.png.

Listing 1: Sample R Script With Highlighting

```
x <-seq(1,200,by=5)
y <- (1 + 1/x)^x
png("plot2.png")
plot(x,y)
dev.off()</pre>
```

## Problem 2

This is the graph from Problem 1.  $\,$
